	Examiner Glenn K Dawson	Art Unit 3731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Pesenti, et al.-5460171.

Pesenti discloses an MDI having a tubular mouthpiece and an actuator including a nozzle block having a tubular element with a free end and a spray orifice 5 for directing spray into the tubular mouthpiece. The nozzle block engages with a valve stem of a canister. Even though the valve stem of the canister does not go inside of the tubular element of the nozzle block, it nevertheless reads on the claim limitations since the canister and valve stem are not positively recited. Therefore, if a canister with a larger valve stem were placed such that the valve stem extended over the nozzle block, it would perform as claimed.

For claim 11, since it is not clear that the canister introduced in claim 11 is the same as the one recited in claim 1, it still leaves open the possibility of the positively recited canister and valve stem being that shown in Pesenti, and the other one inferentially recited in claim 1, is another one with a larger valve stem.

Art Unit: 3731

If the applicant were to positively recite that the valve stem extended over the outer surface of the nozzle block, then the above rejection would be withdrawn.

Allowable Subject Matter

Claims 6-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion
